SUMMARY

Final-year Computer Science student and builder-PM transitioning into Associate PM roles and program management apprenticeships. I define and ship AI-first products from end to end—starting with discovery and PRDs, executing hands-on development, and instrumenting analytics to track actual user behavior. Demonstrated success leading a 10-person cross-functional team, delivering a scoped MVP for a paying client, and launching an AI platform that processed 4,000+ live submissions. Seeking a role where product judgment and technical execution compound.

CORE SKILLS

Product Management: Product Discovery, PRD Authoring, RICE Prioritization, Agile/Scrum, MVP Scoping, Stakeholder Management, User Stories & Acceptance Criteria.

Data & Analytics: SQL, Python (pandas), Mixpanel, Metabase, Cohort & Retention Analysis, A/B Testing, Exploratory Data Analysis (EDA).

Technical Strategy: AI/LLM Integration, Prompt Engineering, React, TypeScript, Next.js, API Integration, Voice Interfaces.

PRODUCT EXPERIENCE

Docmize (AI Hospital Management System) | Junior Software Developer Intern Feb 2026 – May 2026

- Translated product requirements into scalable healthcare workflows and designed AI-assisted user experiences for clinical staff.
- Collaborated within an existing engineering team to coordinate frontend, backend, and design handoffs, ensuring accurate feature delivery.

ServiceHub Private Limited | Freelance Product Consultant Jan 2026 – Feb 2026

- Elicited requirements directly from a paying client and scoped an MVP deliverable within a strict fixed budget and timeline.
- Negotiated feature trade-offs and architected a dual-sided marketplace serving customers, service providers, and operations.
- Owned the full product delivery cycle from initial problem discovery through architecture, sprint execution, and final client handover.

CuteHelper (AI Desktop Companion) | Founder & Product Lead Feb 2026 – Present

- Led product discovery to identify context-switching costs, utilizing the RICE framework to scope the MVP to two high-impact workflows.
- Authored the PRD, user stories, and acceptance criteria while driving the strategic product choice of a voice-first interaction model.
- Instrumented product analytics to track follow-up rates, query lengths, and response gaps to continuously test and validate behavioral hypotheses.

UrbanIQ (Institutional Management Platform) | Product Manager Jan 2024 – Dec 2024

- Led a 10-person cross-functional team to build an AI-assisted institutional complaint platform that successfully processed 4,000+ live submissions.
- Authored 15+ prioritized user stories with acceptance criteria, balancing conflicting requirements across three distinct stakeholder roles.
- Conducting exploratory data analysis on 4,000+ records to identify SLA bottlenecks, reordering workflows to cut resolution time by 30%.

EDUCATION & CERTIFICATIONS

I.K. Gujral Punjab Technical University Expected Nov 2026 B.Tech, Computer Science & Engineering

Certifications: Google Project Management Professional, Electronic Arts PM Job Simulation, Internshala Machine Learning
